

# SignBridge Test Document

This is a mock PDF document used by the SignBridge test client. It contains an AcroForm signature field placeholder named 'Signature1'. When the native host processes a signing request with `pdfOptions.label = "Signature1"`, it will locate this field and apply the PKCS#11 digital signature here.

*Document ID: test-document*

*Generated for: SignBridge Protocol v1.0.3 testing*

*Signature field: Signature1 (AcroForm placeholder)*

[Digital Signature - Signature1]

This area will be filled by the signing process.
